

The easiest way to manage your multilingual website projects

Weglot is a **no-code website translation solution** that allows you to **launch a multilingual website instantly**. Weglot **detects, translates, and displays the content** of any website, removing the pain of managing multiple websites for multiple markets while **automatically applying multilingual SEO best practices** for international visibility.

Weglot is helping **+60k companies** of all sizes and industries and **+4k web agencies & freelancers** to translate their websites effortlessly and reach visitors all over the world.

SEAMLESS INTEGRATION

Implement Weglot on your projects in no time, regardless of the solution you use to develop your websites. Its simple install means even the least tech-savvy can integrate it.

MULTILINGUAL SEO

Become an international growth partner for your customers with a solution built around the multilingual SEO pillars defined by Google: hreflang tags, server-side translation, dedicated URLs...

AUTOMATIC WORKFLOW

Never waste time on manual tasks again. From machine translation, to SEO optimization, and continuous content syncing and detection... Weglot allows you to offer multilingual services to your clients, without any resource-heavy repetitive tasks, even after the project delivery.

FULL EDITING CONTROL

Respond to all your customers' requests thanks to Weglot's powerful project editing capabilities: full management and editing control, language switcher design, media translation, glossary rules and visual editing make website translation management easy.

ONE INTERFACE FOR ALL YOUR PROJECTS

Manage all your clients' projects under the same interface. Create new projects, handle several projects at once and manage your clients' feedback in no time.

COLLABORATIVE TOOL

Easily invite your teammates and clients to their project and work hand in hand with them on website translation, management, and international traffic monitoring.

At Weglot, it's important that we support the great work agencies and freelancers produce for their clients. To help give a complete understanding of our software, we provide exclusive resources based on your team needs:
